

GD-FS2 R

Neutral Ion-exchange Resin

Softening water by exchanging calcium and magnesium ions using neutral ion-exchange resin. Our resin has twice the longevity compared to other typical types.

Main Materials	Neutral Ion-exchange Resin
Rated Capacity	1500 Liters
Inlet Diameter	9.5 mm
Storage Conditions	Unopened product should be stored in a cool (dry), well-ventilated environment, with a recommended shelf-life of one year.
Replacement Cycle	6 months (depending on the water quality)

GD-FS2 U

Composite Filter

Effectively filters sediments, suspended solids, chlorides, organic impurities, odors, bacteria, and improves water taste.

Main Materials	Composite material
Rated Capacity	6000 Liters
Inlet Diameter	9.5 mm
Storage Conditions	Unopened product should be stored in a cool (dry), well-ventilated environment, with a recommended shelf-life of three year.
Replacement Cycle	12 months (depending on the water quality)

Your Needs, Our Priority

*Once the product is opened, it might pose a risk of microbial growth after long periods of non-use. Please replace the filter regularly to maintain the quality of your drinking water.
